Professional Summary

Fullstack Web Developer (MERN) with hands-on experience building dynamic, scalable applications and websites. Currently working on client projects including a real estate web app with user dashboards and a film festival website. Strong foundation in JavaScript, data structures, and collaborative coding (Git/GitHub), complemented by a background in statistics and data analysis. Active participant in the Google Developer Group Abuja, with a growing passion for building impactful tools using AI and modern web technologies. Open to remote roles and relocation (with sponsorship).
